Dear Admissions Committee:

I am pleased to recommend Mr. Liu Dong Xu for admission to your Master's program. As his Operating Systems professor and graduation project advisor at Jiangsu University of Technology, I can attest to his exceptional academic capabilities and research potential.

Mr. Liu demonstrated outstanding academic performance, maintaining a GPA of 83%. He particularly excelled in core computer science courses, scoring above 90% in C Programming, Object-Oriented Programming, and Discrete Mathematics. His performance in my Operating Systems course was equally impressive, earning an A grade.

His graduation project under my supervision showcased his technical expertise and methodical approach to complex problems. He consistently demonstrated strong analytical skills and attention to detail, producing work that exceeded the undergraduate level expectations.

Beyond academics, Mr. Liu's practical achievements stand out. He successfully led an AR-related innovation project, managing a team of five students. He also earned multiple awards in algorithmic programming competitions, demonstrating his problem-solving abilities and competitive spirit.

In the five years following his graduation, Mr. Liu has worked as an IT engineer and a qualified leader of a small algorithm team, gaining valuable industry experience while nurturing his passion for academic advancement. His combination of a strong academic foundation, technical skills, and practical experience makes him an ideal candidate for graduate studies.

I am confident that Mr. Liu has the intellectual capacity, technical background, and dedication required for success in your Master's program. His analytical mindset and proven ability to tackle complex technical challenges would make him a valuable addition to your academic community.

Please feel free to contact me if you require any additional information.

Sincerely,

Department of Computer Science
